1. Manual
2. Auto (random data)
Write number from [1; 2]: 1
10000 - a - b. For exit result must be negative
Write a(|a|<=100000):
Write number from [-100000; 100000]: -1
Write b(|b|<=100000):
Write number from [-100000; 100000]: 1

```

```
Write number from [-100000; 100000]: 1
10000 - -1 - 1 = 10000
Write a(|a|<=100000):
Write number from [-100000; 100000]: 1000000
Invalid input. Try again.
Exception: The value must be in the interval [-100000; 100000]
Write number from [-100000; 100000]: 10000
Write b(|b|<=100000):
Write number from [-100000; 100000]: 0
10000 - 10000 - 0 = 0
Write a(|a|<=100000):
Write number from [-100000; 100000]: 100000
Write b(|b|<=100000):
Write number from [-100000; 100000]: 10
10000 - 100000 - 10 = -90010
Negative result => Task closed
